Planning Safe Online Physical Education Programs

Establishing and maintaining safe online physical education programs requires clear and ongoing communication regarding the policies and practices related to physical education and online learning. School board staff and school administrators should establish processes to disseminate information, seek input and concerns, and, where appropriate, provide the necessary support for individuals responsible for safety (for example, Teachers, occasional Teachers, parents/guardians, students).

The information within this section is meant to support the safe planning for online physical education programs through:

- **Awareness**

- **Processes and Procedures**

- **Communication**
