

Inuit Games

ELEMENTARY - CURRICULAR 2024

- Consult [Disability-Centred Safety](#) if your groups of students include students with disabilities.
- Consult [Risk Management](#).
- The safety standards for this activity must be presented to the activity provider prior to the activity taking place. The activity provider must meet the minimum requirements listed in the safety standards. For more information on planning trips using outside providers, consult [Outside Activity Providers](#).
- Cultural Context:
 - In the Inuit tradition, there is a practical goal for each Inuit Game (for example, strength, agility, coordination, endurance, practical skill development). Each game helps community members hone the hunting and survival skills they need in order to thrive in their Arctic landscape. The games are played throughout life as a in order to keep one's skills sharp. The practical skill practiced in each game should be discussed as a part of its instruction. Many of these games are included in the competitions at the Arctic Games, for which communities come together from across the Arctic.
 - Perhaps unique to the Arctic Games, and the practice of each traditional skill through games, is the spirit of cooperation within the competition. It is desirable for Inuit community members to master the hunting and survival skills represented by each game so they may contribute to the survival of their entire community. If one person is hurt or displays poor skills, that person cannot effectively contribute to the village. Community members work together for the survival of all in their community, and as such focus on any one individual is strongly discouraged. Therefore, even though the competitive nature of the games encourages improvement amongst

competitors, the ultimate goal is to ensure the entire community improves so their hunts may be successful and everyone is kept safe.

- At the Arctic Games, competitors are given three attempts to obtain their personal best. After each attempt, other competitors will step forward and offer their suggestions for improvement in order to help their peer improve. As individuals improve and get stronger, so does the chance of survival for everyone in the community. Competition is the motivation, but cooperation is ultimately the key to success.
- Sample Inuit Games Groupings:
 - Push-Pull and Wrestling/Strength Activities/Games: Muskox Manoeuvres, Back Push, Leg Wrestling, Arm Pull, Hand Pull
 - Agility Games: Ice Floes, Alaskan High Kick, One Foot High Kick, Two Foot High Kick, Kneel Jump
 - Balance and Core Strength: Nose to Item on Ground In Front, Reaching and Placing an Object
 - Endurance Games: Knuckle Hop, Running Race

Equipment

- A fully stocked first aid kit must be readily accessible. (Consult Appendix D – Sample First Aid Kit)
- A working communication device (e.g., cell phone) must be accessible.
- Determine that all equipment is safe for use (for example, no sharp corners, cracks, or splinters).
Students must be encouraged to report equipment problems to the Teacher.

Clothing/Footwear/Jewellery

- Appropriate clothing and footwear must be worn (for example, bare feet, running shoes, or when outside, winter boots). Sock feet are not permitted. Long scarves must be tucked in or removed.
- No jewellery is permitted.
- When long hair poses a safety risk it must be secured. Devices (for example, hair pins, elastics and barrettes) used to tie back long hair must not present a safety concern.
- Students must not participate when the length of fingernails poses a safety risk to themselves or others.

Facilities

- Determine that all facilities are safe for use. Students must be encouraged to report facility problems to the Teacher.
- Playing surface and surrounding area must be free of all obstacles and must provide safe footing and traction.
- Walls, stages, equipment, trees, and posts must not be used as turning points, finish lines, end zones, or boundaries. Establish a clearly delineated boundary line away from the hazards, using visual markers (for example, lines, pylons), to prevent contact/collision.
- Consult [General Safety Standards for Facilities](#) for the opening and closing of gymnasium divider doors/curtains.
- When running takes place off school site for a warm up:
 - Teachers must do a safety check 'walk through' in order to identify potential problems prior to initial use of route or course.
 - Teachers must outline to the students the route or course (for example, notice of areas to approach with caution) before the start of the run.
 - Teachers must determine that students are not crossing busy intersections unless directly supervised.

Environmental Considerations

- When environmental conditions may pose a risk to student safety (for example, thunderstorms [lightning] or student(s) with asthma, triggered by air quality), Teachers must take into consideration their school board/school's protocols and procedures related to:
 - environmental conditions (consult [Weather](#)); and
 - snow conditions (for example, snow/ice storms) and visibility.
- Students must receive instruction on safety procedures related to environmental conditions and be made aware of ways to protect themselves (for example, frostbite, hypothermia).
- The school board's weather procedures are the minimum standards at all times. In situations where a higher standard of care is presented (for example, outside activity providers, facility/program coordinators), the higher standard of care must be followed.

Special Rules/Instructions

- Be aware of students whose medical condition (for example, asthma, anaphylaxis, casts, previous concussion, orthopaedic device) may affect participation. Consult [Medical Conditions](#).
- Students must not participate in the activity until they receive information on concussion prevention specific to the activity, inherent risks of the activity (for example, outline possible risks and ways to minimize the risks), and procedures and rules for safe play. Students must receive instruction on the importance of reporting symptoms related to a suspected concussion.
- Refer to school board policies and procedures (i.e., transportation, excursion/field trip) for communication with parents/guardians, the location of an off-site activity, means of transportation, supervision ratios, and parent/guardian permission.
- Activities must be modified according to the age, ability level, language, and experience of students, number of participants, and the facility available.

- Previous training, fitness level, and the length of time and intensity of physical activity must be taken into consideration.
- Activities must be based on skills that are taught.
- A proper warm-up and cool-down must be included.
- While moving, students must not be required to close their eyes or be blind-folded.
- Emphasize controlled movement when requiring students to walk or run backwards. Backward-running races are not permitted.
- Skills must be taught in proper, traditional progression:
 - Warm-up
 - Agility Games
 - Balance/Core Strength Activities
 - Push/Pull and Wrestling/Strength Activities/Games
 - Endurance Games
 - Cool down
- The students' body position must be checked by the Teacher for proper positioning prior to each activity.
- For Push/Pull and Wrestling/Strength Activities/Games (i.e., muskox manoeuvres, back to back push, leg wrestling, arm pull, hand pull), students must compete with partners of similar weight, strength, and ability.
- For Agility Games, the technique for proper landing must be taught.

- Rules and “illegal” moves must be outlined prior to the activity.
- Prior to the activity, establish rules and procedures (for example, stop/start signal, signal to concede to partner, boundaries).
- Students must be able to select a challenge at their comfort level (“challenge by choice”). Students may choose to opt out of a challenge they are not comfortable with, and in these cases may spot or coach other students.
- The Mouth Pull, Ear Pull, Neck Pull and Airplane are not appropriate activities.
- When a student displays hesitation (verbally or non-verbally) with participating, the Teacher must determine the reason(s) for doubt. If the Teacher believes that a potential hesitancy during the skill could put the student at risk, the student must be directed toward a more basic skill, or be permitted to select a role within the activity at their comfort level, including the choice to not participate.
- Prior to participation, the Teacher must reference and apply their school board's policy on equity and inclusion as it affects student participation and makes appropriate accommodations/modifications to provide a safe learning environment. Consult the Intent subsection within the [About section](#).
- Adequate liquid replacement (personal water bottles, water fountains) must be accessible for students before, during, and after physical activity to prevent dehydration.

Supervision

- All activities must be supervised.
- The type of supervision must be commensurate with the inherent risk of the activity. The level of risk is related to the number of participants, the skill level of the participants, the type of equipment used, and environmental conditions.
- Direct Supervision is required during the safety and initial skill instruction.

- Direct Supervision is required for the duration of all other components of the activity (e.g., equipment setup and take down, warm-ups/cool downs, application of the skills and games).
- A Volunteer, under the direction of a Teacher, can monitor students during physical education activities. Refer to your school board's policy on Volunteers assisting with students' physical activities.
- Responsibilities must be clearly outlined for additional Teachers and Volunteers who are monitoring the activity.
- Where a Qualified Instructor is used and the Teacher is not directly with the Qualified Instructor, the Qualified Instructor must provide safety and initial skill instruction, and monitoring for the safe application of skills and student behaviour for the duration of the activity.

First Aid

- A fully stocked first aid kit must be readily accessible. (Consult [Sample First Aid Kit](#))
- A working communication device (for example, cell phone) must be accessible.
- Follow the school's first aid emergency response (consult [First Aid Plan and First Aid Emergency Response](#)) and the school board's concussion protocol (consult [Concussions](#)).
- An emergency action plan and response to deal with evacuations and lock downs must be followed and communicated to students.

Definitions

- **In-charge Person:**
 - Some activities refer to an "In-Charge" person. While the teacher is in-charge and responsible for the overall safety and well-being of students under their care, sometimes there are other personnel who must be identified as "In-Charge" related to specific situations (for example, a pool lifeguard). In activities where an "In-Charge" person is designated, that person, in consultation with the teacher, must make final decisions regarding safety of the students

- **Monitoring:**

- The role of monitoring is to observe, identify, act, and report:
 - **Observe:** Observe with attention to detail the actions of the students.
 - **Identify:** Identify the student and the unsafe behaviour.
 - **Act:** Take appropriate actions to safeguard students and others (e.g., stop the activity).
 - **Report:** Provide the name of the student and the unsafe behaviour to the teacher for management and direction.

- **Monitor:**

- An individual who assists the Teacher with a group of students, (e.g., Volunteer, Qualified Instructor) and has a responsibility to monitor student behaviors for the duration of the activity.

- **Outside Activity Provider:**

- A commercial company, volunteer organization, or individual, not associated with the school board, who possess the required qualifications to provide safety and initial skill instruction, and monitoring for the duration of an activity.

- **Qualified Instructor:**

- An individual who provides safety and skill instruction, and monitoring for an activity, and possesses the required qualifications (e.g., experience, certifications). This role could be fulfilled by a teacher, volunteer, or an employee of an outside provider. An instructor does not have the authority to supervise.

- **Supervision:**

- The vigilant overseeing of an activity for management or direction. Activities, facilities, and equipment have inherent risks, but the more effectively they are supervised, the safer they become.
- The Ontario Physical Activity Safety Standards in Education includes three Types of supervision, Direct Supervision, On-Site Supervision, and In-the-Area Supervision. These types of supervision

take into consideration the level of risk, which is related to the number of participants, the skill level of the participants, the type of equipment used, the environmental conditions, the age, and developmental stage.

- The three types of supervision described are not hierarchical but represent the type of supervision that activities require and the type of supervision that is inherently possible.
- Some activities in OPASSE transition from one type of supervision to another type of supervision (e.g., Direct Supervision to On-Site Supervision OR On-Site Supervision to In-the-Area Supervision).

- **Teacher:**

- A person with a current certification from the Ontario College of Teachers and under contract by the school/school board (i.e., teacher, vice-principal, principal). This person is legally responsible for the students and has the authority and responsibility to supervise.

- **Types of Supervision:**

- **Direct Supervision:**

- Direct Supervision requires that the Teacher is physically present at the activity, providing visual and verbal oversight for management and direction of both, the activity and student safety.
- **Provisos:**
 - No other activity can occur when part of the activity or the entire activity is under Direct Supervision when there is only one Teacher supervising.
 - The Supervision section of the relevant activity safety standards page in the Ontario Physical Activity Safety Standards in Education describes when parts of an activity are under Direct Supervision.
 - Where a Qualified Instructor(s) is providing the safety and initial skill instruction and monitoring for one activity and requires the Teacher to be present at that activity for management and direction.

- An activity may be under Direct Supervision:
 - During the entire duration of the activity;
 - During the set up and take down of equipment; .
 - During the safety and initial skill instruction;
 - During the performance/practice of the activity skill; and
 - When the activities transition from Direct Supervision to On-Site Supervision.

○ **In-the-Area Supervision:**

- The Teacher is located in proximity to a combination of locations where the student activities take place, is circulating, and is accessible for providing management and direction of the physical activity and student safety.
 - Provisos:
 - The Teacher is circulating between the activities occurring at separate locations, and is readily accessible, or the location of the Teacher is communicated to the student.
 - Where a Qualified Instructor(s) is providing the safety and skill and instruction and is monitoring at a combination of locations, the Teacher is located in proximity to where the student activities take place, is circulating between the activity locations, and is accessible for management and direction.
 - Students may be out of sight for periods of time.
- An activity or a component of the activity is under In-the-Area Supervision:
 - Where the same activity is located in separate locations (e.g., Fitness activities);
 - Where two or more activities under In-the-Area Supervision occur in separate locations (e.g., Badminton, Table Tennis, Handball (Wall));

- Where the skill application of the activity takes place at a separate location from the teacher (e.g., Cross Country Running, Skiing (Alpine), Cycling, hiking on trails);
- When the activities occur in double or triple gymnasiums; and
- Where more than one Qualified Instructor is providing activities at a combination of locations.

○ **On-Site Supervision:**

- The Teacher is present at one location where the student activity takes place (e.g., gymnasium, sports field, climbing wall at an Outside Activity Provider's facility, campsite) and is accessible for providing management and direction of the physical activity and student safety.
 - **Provisos:**
 - Where more than one activity occurs in one location, the Teacher is circulating between the activities and is accessible for management and direction.
 - Momentary presence in adjoining rooms (e.g., equipment room, outdoor storage shed, boathouse, staff tent) is considered to be On-Site Supervision.
 - Where a Qualified Instructor(s) is providing the safety and initial skill instruction and monitoring for an activity or a combination of activities at one location and the Teacher is present and is circulating and accessible for management and direction.
- An activity may be under On-Site Supervision:
 - During the entire duration of the activity;
 - During the safety and initial skill instruction;
 - With activities using multiple stations while the Teacher is circulating;

- When combining two or more activities at one location while the Teacher is circulating; and
- When activities transition from On-Site Supervision to In-the-Area Supervision.

- **Volunteer:**

- A responsible adult (e.g., Educational Assistants, Retired Teachers, Co-op Students, Parents/Guardians, Teacher Candidates) approved by the Principal/Designate who is under the direction of a Teacher and has been instructed on their monitoring responsibilities. Refer to your school board's policy on volunteers assisting with student's physical activities.
